

CONSENT AGENDA

ITEM SUMMARY

MEETING DATE: March 11, 2025

SUBJECT: CSP F-150 pickup purchase

DISCUSSION/BACKGROUND:

We may have the opportunity to purchase 2 CSP F-150's. These trucks are approximately 5 years old, have approximately 100,000 miles on them, and have been serviced regularly every 5,000 miles. One truck includes a topper, one has a bed cover, and both include emergency lighting. We are routinely finding ourselves short on vehicles for training, Duty Firefighters, and running errands. If purchased, we have several ideas and potential locations that need to be vetted to determine the best location. We will be prioritizing the availability of response vehicles and the longevity of larger pickups.

FINANCIAL/ECONOMIC IMPACT:

The cost of both trucks is \$21,500. Our 2025 budget includes \$40,328 applied to Apparatus Capital. I also anticipate being \$10,000 under budget on the new brush truck, and we have additional revenues pending from our 14-day Palisades deployment.

The purchase of these trucks will extend the life of some of our current vehicles as well increasing our efficiency.
