

## CONSENT AGENDA ITEM SUMMARY

MEETING DATE: May 12, 2026

**SUBJECT:** Vermeer S925 TX Mini Skid with Grapple and Bucket

### DISCUSSION/BACKGROUND:

We have been searching for the most economical and practical piece of equipment to help the mitigation crew. The goal is to speed up work, improve efficiency, and minimize injuries. Several other tree companies have recommended these mini skids, and our Coordinator and Assistant have used them previously.

There will also be some uses for this equipment around the stations, from landscaping to moving snow berms. This 2021 model is on hold for our mechanic, who plans to go inspect and pick it up in Colorado Springs on Thursday, if approved.

### FINANCIAL/ECONOMIC IMPACT:

We have agreed on a purchase price of \$26,000. To date this year, we have grossed about \$40,000 in mitigation, and this is the best option for reinvesting in the program.
